The seminar is designed to present current and new concepts, special techniques, and practical clinical approaches for patients undergoing gastrointestinal procedures. The one-day seminar will include an intensive and comprehensive review of multiple disciplines of gastroenterology, as well as nurse's role and evidence based practices in caring for this patient population.

Course Objectives

1. Increased knowledge regarding the scientific advancements of digestive disorders
2. Review advances in clinical research and implications in managing GI patient population
3. Discuss current and emerging diagnostic and therapeutic approaches and application in GI nursing practice

Enroll early to ensure your seat at this exciting and always well-attended seminar at
